Hello,

I'm a senior at Mississippi State University double majoring in Graphic Design and Mechanical Engineering. My journey began not knowing how to connect the two, but eventually I realized that my love for gaming links them both. I believe game design is a career that perfectly balances my creative and analytical side. I seek harmony between art & engineering. To work smart, and not hard. To love all things design.

Being an active member of the MSU Formula Society of Automotive Engineers has taught me how to be a team player. I spend up to 30 hours a week designing and building a car with other engineers. I have strong organizational, leadership, communication, and interpersonal skills; a strong work ethic; willingness to learn; and the ability to work independently when needed. I can work long hours, am great with deadlines, and I work well under pressure.

Over the years, I acquired the analytical, technical, and problem-solving skills necessary to create and execute successful designs. In 2013, I designed a marketing advertisement for *The Hattiesburg Racquet Club*; in 2016, I produced high quality graduation portraits, along with a CD for a client; and in 2017, I designed the company logo for *The Hattiesburg Writing Institute, LLC*, and am currently redesigning their website.

I want to thank you for taking the time to read this letter. I look forward to working with you!

Sincerely,

Daeja Thomas
